

# The Learning Studio

Classes in Mathematics and Writing (grades 3,4,5)

## **Investigating Mathematics through Visual Arts & Problem Solving**

**Thursdays 3:40 - 4:30 pm**

*-By integrating real-world, and visual art experiences with math activities, students become more actively involved in their learning. This session will also incorporate cooperative problem solving, involving open-ended solutions. Students will be encouraged to push their thinking further, to apply what they've learned, and to be confident in their skills. Instruction will be grade level appropriate and include lessons on geometry, measurement, and number sense.*

11 sessions: January 12th - March 29th

Cost: \$100

## **Writing Club**

**Wednesdays 3:40 - 4:30 pm**

*-While providing additional instruction in a variety of writing genres, the Writing Club also offers students a chance to be creative and to receive productive feedback on their work. Each class will have an instructional focus - looking at genres, styles, and techniques - with an assigned task. Students will work independently, as well as cooperatively, and will receive individual support throughout the class.*

9 sessions starting January 4th

Cost: \$75

Classes will be held at Queen Anne Elementary. Class size is limited to 12 students and registration is first-come, first-served. *If there are not enough students registered by the deadline, you will be contacted about either a refund, or a change in the number of sessions offered.* Please return your registration form, with the correct tuition, to the office in the envelope marked, THE LEARNING STUDIO. Checks are to be made out to The Learning Studio. \*A limited number of scholarships are available.\*
